

ABU Artificial Intelligence (AI) Policy

Artificial intelligence (AI) has been making headlines in nearly every industry, with recent technologies like ChatGPT. The ABU is actively exploring ways to integrate AI technology advancements into our processes to further our mission.

Before deploying a utilization strategy for these tools, we need to better understand the many unknowns, nuances, and complexities involved.

The ABU currently prohibits using AI tools to generate or modify exam content. The extensive urologic knowledge and exceptional research and writing skills of the Trustees have served the Board very well thus far, and we are confident that this will continue.

Innovation is at the forefront of the ABU. We will keep you informed of any changes to our working policy regarding these rapidly evolving technologies.
